## Isuzu Trooper WONT START! Strong exhaust fumes!

Posted by bmwz3rdstr - 2009/08/24 13:24

---

Hi there~

My Isuzu Trooper died while driving the other day, started making winding sound & wouldn't turn over. Mechanic said something was wrong with he crank but it JUST started for me 2 weeks later but shortly dies afterwards w/ strong exhaust fumes. Any ideas??

It is a 95 Trooper.

Thank You, Holly

Sounds to me like it jumped time. Engines sound different spinning when they don't have any compression. Have you had it checked since your post?
